

## BLACK HAWK WIDE BODY

To create the Black Hawk, the Chelsea Truck Co. team went back to the drawing board, reimagining each aspect of the vehicle from the ground up. Working with a direct supply of new vehicles from Jeep, they have created an innovative design which marries iconic American engineering with military-inspired British style.

As a personal project headed by Design Director Afzal Kahn, the painstaking attention to detail and passion for perfection is clear to see in the finished product. With every component tailor-made and precisely engineered, the build quality is comparable to that of a fully coach built vehicle.

Widened wheel arches at the front and rear coupled with a redesigned front bumper assembly and four slot grille give the vehicle unparalleled visual presence. This robust style extends to details such as the crosshair exhaust system, vented Iron Man bonnet and choice of purpose designed Kahn wheels.

Inside the luxuriously appointed interior contrasts with the Black Hawk's rugged appearance. Quilted leather upholstery in a range of exclusive colours is complemented by hand stitched detailing, reflecting the precision associated with the Chelsea Truck Company brand.

Only 49 vehicles will be built in each exclusive colour scheme, making every Black Hawk a rare and collectable creation, available solely from the Chelsea Truck Company and selected partners.

This is reflected in the recent independent assessment of the Black Hawk's value by trade price specialists CAP, which awarded it a 35% higher residual value than the standard Jeep Wrangler model.

The result is a unique vehicle in a league of its own, and unlike anything on the market today.
